

CannaLabs Crypto Whitepaper

CannaLabs cryptocurrency token provides holders with synthetic exposure to the legalized recreational cannabis industry utilizing blockchain (web3) technology. Exposure includes Research & Development, Facility build-out & Maintenance, Governance, Production & Processing, Sales & Profit Realization and Expansion.

CannaLabs crypto is a cryptocurrency token (cw20) built & running on Juno Networks / Cosmos IBC. CannaLabs crypto has a total capped supply of 1,000,000 tokens and can be purchased initially through JunoSwap. CannaLabs token will offer several investment incentives including farming (staking & liquidity pools), P2E Gaming & NFTs; as well as Governance utility & rewards / bonuses for early adopters & supporters.
